Mico H. Gianan

FULL-STACK DEVELOPER

Philillipines, Taguig | 0939 319 1546 | micogianan28@gmail.com | https://github.com/manokkk

PROFESSIONAL SUMMARY

Adaptable full-stack web and mobile developer specializing in Next.js, NestJS, .NET Framework, and React Native (Expo), leveraging strong problem-solving skills and database expertise to build robust, scalable cross-platform applications.

EXPERIENCE

Full-Stack Developer Inspire Holdings Inc. (Internship) **February 2026 - May 2026**

- Acted as a primary full-stack web and mobile developer within a cross-functional team, driving the delivery of robust applications utilizing Next.js, NestJS, .NET Framework, and React Native (Expo).
- Championed development standards and conducted rigorous code reviews, actively mentoring fellow developers to improve overall code quality, collaboration, and team efficiency.
- Architected and optimized database solutions using Supabase and Firebase, strategically integrating Redis caching to maximize application performance and scalability.
- Contributed to strategic project planning and task execution, ensuring technical alignment and the timely delivery of critical software milestones.

Project Full-Stack Web & Mobile Developer **2022 - 2026**

- Collaborated within multidisciplinary teams as a core developer to build and integrate both frontend and backend components for various academic software projects.
- Engineered end-to-end full-stack applications and designed RESTful APIs utilizing React, Laravel, Django, and FastAPI, alongside PostgreSQL and MongoDB databases.

PROJECT

ISAP - TUPT Thesis Archive: Intelligent Search and Access Platform

- Engineered and executed end-to-end testing on a scalable, role-based digital repository, ensuring secure authentication, data integrity, and the flawless integration of administrative management tools.
- Developed and rigorously validated a machine learning semantic search engine and an AI-driven thesis improvement module, achieving strict performance metrics such as 90% search accuracy and sub-5-second retrieval times.
- Designed continuous quality assurance strategies across the entire platform, encompassing security, performance, and usability testing to guarantee a reliable, bug-free, and highly accessible user experience.

SKILLS & TECHSTACKS

- Full-Stack Development (Web, Backend & Mobile)
- Next.js, NestJS, React, React Native, .NET, MERN
- Database Design & Management (PostgreSQL, MongoDB, SQL/NoSQL, Supabase, Firebase)
- RESTful API Development & Integration
- IoT Development (Raspberry Pi, ESP32, Python, FastAPI)
- Cloud Deployment & DevOps (Docker, GCP, Vercel, Render)
- Version Control (Git, GitHub, GitLab) Agile Methodologies, Team Leadership & Code Reviews
